#### **ENHANCEMENTS**

# RETENTION+™ SCULPTING LIQUID

#### WHAT IT IS

A keratin-bonding, cross-linking sculpting liquid for lift-prone clients.

#### WHAT IT DOES

Creates enhancements with superior adhesion to the natural nail.

#### WHY YOU NEED IT

 Use on clients with enhancements that are prone to lifting.

.....

· Excellent adhesion makes primer use optional.

## FEATURED INGREDIENTS & BENEFITS Ethyl Methacrylate:

An important monomer used in most artificial nail liquids. Despite its strong and distinctive odor, this monomer has twice been determined to be "safe as used by Nail Professionals" according to the Cosmetic Ingredient Review expert panel (CIR) (1995, 2002).

### Dimethyltolylamine:

A catalyst in the liquid monomer that activates the benzoyl peroxide initiator in the polymer powder.

#### **UV** Absorber:

Added to prevent discoloration and breakdown of nail enhancements, polish, top coats, and treatments. Also used to stabilize the color of cosmetic formulations.

#### Plasticizers:

Increase the strength and flexibility of enhancements.

#### **DIRECTIONS FOR USE**

- Perform a manicure and ensure that the natural nail is thoroughly cleansed and prepared.
- · Apply primer if desired.
- Sculpt the nail in 3 zones using a medium mix ratio (1.5 parts liquid to 1 part powder).
- Shape and refine using a 180-grit file or higher.

CND offers comprehensive education opportunities. Check the education section of CND.com for a class near you.

#### **CREATIVE SUGGESTIONS**

For a long-lasting pedicure apply to toenails.

#### **INGREDIENT LISTING**

Ethyl Methacrylate, Methacrylate Monomers, Dimethyltolylamine, UV Absorber, Plasticizers, Violet 2 (CI 60725).

.....

(See glossary for complete ingredient description.)

#### **AVAILABLE SIZES**

 Professional: 1 fl oz (29 mL), 4 fl oz (118 mL), 8 fl oz (236 mL), 16 fl oz (473 mL), 32 fl oz (946 mL), 64 fl oz (1894 mL), Gallon (3785 mL)
