

Product Profile

ENHANCEMENTS

PERFECT COLOR POWDERS

WHAT THEY ARE

Advanced sculpting powders with easy workability and enhanced color options.

WHAT THEY DO

- Activate the cross-linking and polymerization of Retention+™, Radical SolarNail™ and Moxie™ sculpting liquids.
- Create enhancements with superior adhesion when used with Retention+.
- Create tough, crack-resistant enhancements when used with Radical SolarNail.
- Create enhancements with superior speed when used with Moxie.

WHY YOU NEED THEM

- For use with Retention+, Radical SolarNail or Moxie sculpting liquids.
- **Color Options:** Clear, Natural - Sheer, Blush Pink - Sheer, Pure Pink - Sheer, Intense Pink - Sheer, Warm Pink - Opaque, Neutral Pink - Opaque, Cool Pink - Opaque, Soft White - Opaque, Pure White - Opaque, Red - Opaque, Yellow - Opaque, Blue - Opaque, Green - Opaque, Purple - Opaque, Orange - Opaque, Black - Opaque, Iridescent Glitter - Sheer, Silver Shimmer - Semi-sheer, Charcoal Shimmer - Semi-sheer, Copper Shimmer - Semi-sheer, Brown Shimmer - Semi-sheer, Gold Shimmer - Semi-sheer, Black Shimmer - Opaque, White Shimmer - Opaque.

FEATURED INGREDIENTS & BENEFITS

Polyethylmethacrylate:

A polymer made from ethyl methacrylate monomer.

Methacrylate Copolymer:

A general term for any polymer made from two or more different methacrylate monomers. Monomers are used to make artificial nail liquids and UV gels. Monomers are “reactive” ingredients. When mixed with the powder component the liquid monomer will harden (polymerize).

Benzoyl Peroxide:

An ingredient in the polymer powder which activates the chemical reaction that causes the monomer liquid to harden or polymerize and form the artificial nail.

DIRECTIONS FOR USE

- Perform a manicure and ensure that the natural nail is thoroughly cleansed and prepared.
- Apply primer, if desired.
- Sculpt the nail in 3 zones using a medium mix ratio (1.5 parts liquid to 1 part powder).
- Shape and refine using a 180-grit file or higher.

CND offers comprehensive education opportunities. Check the education section of CND.com for a class near you.

CREATIVE SUGGESTIONS

Blend two or more Perfect Color Sculpting Powders to create a custom shade. Use with CND Sculpting Liquid to create Custom Blended Enhancements.

INGREDIENT LISTING

Polyethylmethacrylate, Methacrylate Copolymer, Benzoyl Peroxide. May contain: Colorants, Silica, Boron Nitride. (See glossary for complete ingredient description.)

AVAILABLE SIZES

- Professional: .8 oz (22 g), 3.7 oz (104 g), 16 oz (453 g), 32 oz (907 g)
- Bolds available in .8 oz, Collections only
- Shimmers available in .8 oz, Collections only
