

## Product Profile

ENHANCEMENTS

# NAILPRIME

### WHAT IT IS

Bonding agent that permanently adheres Liquid & Powder enhancements to natural nail.

### WHAT IT DOES

Forms powerful covalent bonds between Liquid & Powder enhancement product and natural nails for superior adhesion.

### WHY YOU NEED IT

- Non-corrosive formula eliminates burning and thinning of nail plate.
- Prevents lifting.

### FEATURED INGREDIENTS & BENEFITS

#### **SD Alcohol 40-B:**

Solvent used to dissolve or blend together ingredients. Also used as an antiseptic and astringent.

#### **Methacrylate Ester Monomer:**

A general term used to describe any type of methacrylate monomer.

### DIRECTIONS FOR USE

- Ensure nail plate is thoroughly cleansed and prepared.
  - Dip brush into bottle; press against edge of bottle to drain. Avoid touching brush to table towel.
  - Apply NailPrime onto nail plate up to cuticle area. Avoid touching the skin or flooding cuticle area.
  - Apply on 2-3 nails. Repeat until all nails are coated. Nail plate must be thoroughly and evenly coated to assure proper adhesion.
  - Allow to dry before applying enhancement products.
- \* NailPrime can be used with Retention+™, Radical SolarNail™ or Moxie™ sculpting liquids, and can be used over existing enhancement product.
